Summary

Computer Science (Applied) MSc student with a strong fundamental understanding of computer science and hands-on experience designing, building, and shipping RESTful APIs used in production. Experienced in JavaScript and Java, with working familiarity across additional languages, and ability to learn unfamiliar systems quickly through independent research and mentorship. Comfortable giving and receiving feedback through code review and cross-functional collaboration.

Education

Maynooth University

Master of Science in Computer Science (Applied)–70.3%(First Class)

Sep. 2025 – Sep. 2027

Maynooth, Ireland

University of Mumbai

Bachelor of Engineering in Computer Engineering–88.92%(First Class)

Aug. 2019 – May 2023

Mumbai, India

Experience

Tata Consultancy Services

Systems Engineer

Oct. 2023 – Aug. 2025

Mumbai, India

- Designed and developed 10+ scalable RESTful APIs in a large-scale distributed microservices environment, owning the full lifecycle from requirements to production deployment while enforcing strict RBAC to secure sensitive information.
- Optimised distributed system performance by refining database query and indexing strategies, reducing average API response time by 30%, and architected workflow orchestration that cut manual operational intervention by almost 60%.
- Diagnosed and resolved production API issues through log analysis and backend debugging, restoring service functionality and reducing system downtime, while maintaining incident notes to help others troubleshoot recurring API errors.
- Participated in the full software development lifecycle from requirements gathering and system design through to development, testing, and production delivery across 3+ projects, collaborating with cross-functional engineering stakeholders through code reviews and design discussions.

Unum

IT Operations Intern

June 2026

Carlow, Ireland

- Shadowed the IT Operations team to gain practical exposure to enterprise-level IT environments and the platforms/tools supporting global business operations.
- Observed Agile ways of working across cross-functional teams and attended structured sessions on different IT roles, building a stronger understanding of professional workflows and collaborative culture in a corporate setting.

Projects

Real-Time Chat Application | *Node.js, Express, TypeScript, PostgreSQL, Redis, Socket.io*

Jun. 2026 –Jul. 2026

- Built a real-time chat application supporting authenticated multi-room messaging with persistent history, using Node.js, Express, TypeScript, PostgreSQL, Redis, and Socket.io, implemented JWT-based authentication with bcrypt password hashing and Zod input validation, maintaining feature isolation through pull requests and structured Git workflows to secure both REST and WebSocket connections.
- Engineered an event-driven backend handling real-time presence, typing indicators, and cursor-based pagination for scalable message retrieval.

AI-Powered Study Assistant | *Python, FastAPI, Hugging Face Transformers, React.js*

August 2025

- Developed a full-stack AI study assistant that ingests lecture notes and PDFs, using Hugging Face transformer models to generate summaries and quiz questions in under 10 seconds; built a FastAPI microservice exposing RESTful APIs for document processing and question generation, integrated with a React.js frontend.
- Configured a BERT-based NLP pipeline for extractive summarisation and question generation, then created and executed system test scripts with strong test coverage across 5+ diverse academic documents, reducing response latency by 35% through iterative analysis and optimisation.

Technical Skills

Languages: Python, Java, C, HTML/CSS, JavaScript, TypeScript, SQL

Frameworks and Tools: Node.js, Express, NestJS, React.js, Socket.io, Git/GitHub.

Databases and Cloud: PostgreSQL, SQL, MongoDB, Redis, Microsoft Azure, AWS, Kubernetes.

Others: JWT Authentication, Log Analysis.

Extracurricular

DiGRA (Digital Games Research Association) Conference

Student Volunteer

June 2026

Maynooth, Ireland

- Facilitated smooth session coordination and presentation delivery for the chairperson and presenters.
- Demonstrated teamwork and initiative by collaborating with cross-functional presenters and chairpersons to ensure smooth session delivery.
